The 120-mm artillery pieces and 12 x 120-mm mortars mentioned in the reference report confirm the 1054th How Arty dept of the 18th Mecz Div in Ludwigslust and indicate that the division's unidentified mortar regiment may also be stationed at the post. It is therefore impossible to account for the 12 mortars mentioned in paragraph 2 of the present report, because they exceed the T/E of a mechanized regiment. Mor can the 122-mm artillery piece be accounted for. The vehicles mentioned in the present report belong to the 18th Mecz Div, to the headquarters and beadquarters units of the IX Mtz Rifle Corps, and to an unidentified AMA unit in the Mino Meinat settle (corpsent. As before the 1951 summer exercises, the Meuc Meinat settle is still believed to quarter an unidentified AAA unit.  In a report of October 1951, another source stated that the AIte Kaserne, Parchim, quartered an AAA unit, elements of which were allegedly located in	oment. oment •25X1A
Hara for the Aced and in the Neue Heimat settlement.	25X1A
